

LIST OF PAPERS PUBLISHED IN “PHYSICO-CHEMICAL MECHANICS OF MATERIALS” IN 2023

<i>Pohrelyuk I. M., Lavrys S. M., Trush V. S., Luk'yanenko A. G., and Kravchyshyn T. M.</i> Effectiveness of gas nitriding of two-phase titanium alloys	1	5
<i>Podhurska V. Ya., Kuprin O. S., Chepil R. V., Ostash O. P., Prikhna T. O., Sverdun V. B., and Bortnytska M. O.</i> Physicomechanical properties of coatings based on MAX phases of Ti_2AlC and $(Ti, Nb)_2AlC$ at 20°C and 500°C	1	14
<i>Trembach B. O., Hlushkova D. B., Hvozdetyskiy V. M., Vynar V. A., Zakiev V. I., Kabatskiy O. V., Savenok D. B., and Zakavorotnyi O. Yu.</i> Prediction of filling factor and charge density of self-shielding flux-cored wire with variable composition.....	1	22
<i>Kolomiyets V. V., Antoshchenkov R. V., Luk'yanenko V. M., Ridnyi R. V., Kharchenko S. O., Fabrychnikova I. A., Bohdanovych S. A., and Svirhun O. A.</i> Characteristics of the quality of deposited details treatment.....	1	30
<i>Babak V. P., Fialko N. M., Shcepov V. V., Kharchenko S. D., Hladkyi Ya. M., and Bys S. S.</i> Self-lubricating glass composite nanocoatings	1	37
<i>Shevchenko O. M., Kulak L. D., Kuzmenko M. M., Koval O. Yu., Kotko A. V., Kravchenko I. F., and Firstov S. O.</i> The influence of the deformation and heat treatment on the structure and heat-resistant properties of Ti–Al–Zr–Si alloys.....	1	44
<i>Veseliyska H. H., Student M. M., Posuvailo V. M., Zadorozhna Kh. R., and Chuhai O. M.</i> Electrochemical properties of plasma-electrolytically oxidized aluminum coatings sprayed on MA5 magnesium alloy	1	53
<i>Dergach T. O., Sukhomlin G. D., Deyneko L. M., Zhou-Hua Jiang, and Jialong Tian.</i> The influence of surfactant elements on grain boundary structure of grain boundaries and resistance against intergranular corrosion of austenitic Cr–Ni and Cr–Ni–Mo steels.....	1	59
<i>Shcherbakova L. G., Korzhova N. P., Legka T. M., Sameluk A. V., Voskoboinik I. V., and Melnyk V. Kh.</i> Corrosion resistance of eutectic Al–Mg–Ge alloys.....	1	64
<i>Vasylyev G. S. and Herasymenko Yu. S.</i> Use of corrometers for controllable reagent water treatment in heating networks	1	71
<i>Yapontseva Yu. S., Maltseva T. V., Kublanovsky V. S., and Vyshnevskyi O. A.</i> Corrosion behavior of electrolytic CoRe alloys under exposure in an alkaline media	1	79
<i>Danyliak M.-O. M. and Korniy S. A.</i> Corrosion inhibition of aluminium alloy by environment-friendly composition based on gum arabic and zinc acetate.....	1	85
<i>Demchenko N. R., Tkachenko S. V., and Bondar O. S.</i> Inhibition of microbial steel corrosion by quaternary salts of imidazoquinolinium	1	93
<i>Chernov I. O., Zuyok V. A., Grytsyna V. M., [Belash M. M.], and Kolodiy I. V.</i> Corrosion resistance of dysprosium titanate powders and tablets in the model environment of the coolant of the WWER-1000	1	100
<i>Andreikiv O. Ye., Dolinska I. Ya., Zviagin N. S., and Liubchak M. O.</i> Acoustic- emission method for determining the residual life of energy equipment with creep cracks under static load	1	104
<i>Majd M. Kh., Bahrami M., Nouri A., and Nazarpak M. H.</i> A finite element comparison between two sizes of NiTi commercial staples used in scaphoid fracture fixation	1	112
<i>Kozachok O. P.</i> Local frictional wear of an elastic half-space with a regular system of protrusions	1	121

Korzykh V. M., Khaskin V. Yu., Kvasnytskyi V. V., Ganushchak O. V., Hos I. D., Peleshenko S. I., Demianov O. I., Konoreva O. V., and Fialko N. M. Preparing integrated joints of titanium alloys with steels (A review).....2	5
Trush V. S., Pohrelyuk I. M., Luk'yanenko O. G., Kravchysyn T. M., and Fedirko V. M. The influence of heating modes on heat-resistance of Zr and the Zr–1% Nb alloy.....2	17
Gorban V. F., Firstov S. A., and Krapivka M. O. The influence of different factors on physicomachanical properties of high-entropy alloys with fcc lattice2	24
Nengjun Ben, Vytiaz O. Yu., and Hrabovsky R. S. Mechanical properties of steel for floating offshore platforms under static and cyclic loading2	30
Gogaev K. O., Sydorchuk O. M., Myslyvchenko O. M., Yevych Y. I., and Hongguang Ye. The influence of operating conditions on the structure and mechanical properties of 4X4H5M4Φ2 die steel.....2	36
Ivanov O. O., Prysiazniuk P. M., Bodrova L. G., Kramar G. M., Marynenko S. Yu., Koval I. V., and Guryk O. Ya. 3D simulation of the structure of soldered materials based on Fe–Ti–Mo–B–C system2	41
Kushnir R. M., Zhydyk U. V., and Flyachok V. M. Thermoelastic state of a nonhomogeneous orthotropic cylindrical shell with an open profile under transient heating.....2	47
Skalskyi V. R., Mokryi O. M., Zvirko O. I., Kyryliv V. I., Romanyshyn I. M., and Maksymiv O. V. Assessment of characteristics of nanocrystalline layer using the surface acoustic waves2	56
Chausov M. G., Maruschak P. O., and Pylypenko A. P. The influence of impact- oscillation load on hardness of surface layers of Д16чАТВ aluminium alloy.....2	62
Hembara O. V., Holian O. M., Chepil O. Ya., Paliukh V. M., Sapuzhak Ya. I., and Soviak I. M. Assessing life time of a shaft with a crack in hydrogen2	67
Berezovets V. V., Kononiuk O. P., Denys R. V., and Zavalii I. Yu. Synthesis and hydrogen sorption of MgH ₂ composites with TiFe and Ti ₃ FMgH ₂ additives2	73
Khoma M. S., Pokhmurskii V. I., Chuchman M. R., Vasylyv Kh. B., Ivashkiv V. R., and Ratska N. B. Corrosion-mechanical properties and susceptibility to hydrogenation of pipe steel in the presence of carbon oxide and hydrogen sulphide in environment.....2	80
Dittes A., Mehner T., Friedrich S., Awiszus B., and Lampke T. Quantitative model for the prediction of the corrosion rate of cold-rolled 316L steel2	88
<u>Borisov Yu. S.</u> , Vigilianska N. V., Iantsevitch C. V., and Demianov I. A. Corrosion resistance of pseudoalloy copper-iron coatings obtained by the electric arc spraying2	98
Veseliyska H. H., Hvozdetyskyi V. M., Student M. M., Zadorozhna Kh. R., and Dzioba Yu. V. The influence of the electrolyte composition for hard anodizing of aluminium on corrosion resistance of synthesized coatings2	103
Khlopyk O. P., Zin I. M., Datsko B. M., Bilyy L. M., Duriagina Z. A., and Korniy S. A. Anticorrosion properties of composite inhibiting pigment based on natural calcium silicate and zinc monophosphate2	109
Slobodyan Z. V., Mahlatiuk L. A., Kupovych R. B., and Sobodosh N. Yo. Inhibition of carbon steel corrosion by polyvinylpyrrolidone in chloride-acetate solution and in model strattal water2	117
Stechyshyn M. S., Skyba M. Ye., Stechyshyna N. M., Mashovets N. S., and Medvedchuk N. K. Wear resistance of glow-discharge nitrided 08X18H10 steel2	123
Muravsky L. I. Determination of the surface displacement field under dynamic loads by the method of phase-shifting correlation speckle pattern interferometry3	5
Gubenko S. I. Specific features of stresses relaxation and recrystallization of steels under laser heating.....3	15

<i>Narivs'kyi O. E., Subbotin S. O., Pulina T. V., Leoshchenko S. D., Khoma M. S., and Ratska N. B.</i> Mechanisms of pitting corrosion of austenitic steels of heat-exchangers in circulating waters and its prediction	3	23
<i>Khlopyk O. P., Zin I. M., Tymus M. B., Holovchuk M. Ya., and Kalakhan O. S.</i> Aluminum alloy corrosion inhibition with a composition of guar gum and potassium sorbate	3	31
<i>Moltasov A. V. and Klymenko A. V.</i> The influence of corrosive dissolution of the surface metal layer on the stress concentration coefficient in butt welded joints.....	3	37
<i>Kravchenko I. V., Suvorin O. V., and Tatarchenko H. O.</i> Corrosion activity of low-carbon steel under action of a multi-component anti-icing reagent	3	43
<i>Syrotyuk A. M., Leshchak R. L., Hrynenko M. V., and Hembara N. T.</i> Evaluaton of the risk of hydrogen embrittlement of long-term operated 10Г2БТ steel gas pipelines.	3	48
<i>Zvirko O. I., Hredil M. I., Tsyurulnyk O. T., Student O. Z., and Nykyforchyn H. M.</i> Mechanism of development of damages of low-strength pipe steel due to hydrogenation under operation	3	54
<i>Kononiuk O. P., Zavalii I. Yu., Berezovets V. V., Kytsia A. R., and Borukh I. V.</i> Production of hydrogen by hydrolysis of magnesium hydride composites with additions of TiFe/Ti ₃ Fe ₃ O and graphite	3	60
<i>Tsybailo I. O. and Krechkovska H. V.</i> The structural-mechanical state of 12X1MΦ steel of HPP pipeline bend after long-term operation	3	67
<i>Luzan S. O. and Bantkovskiy V. A.</i> Structure and tribotechnical properties of deposited composite layers based on ПГ-10H-01 alloy containing Al ₂ O ₃	3	74
<i>Drobenko B. D. and Bardyn T. P.</i> The strength of the welded joint of the collecting pipe and the manifold of boiler primary steam overheater.....	3	81
<i>Kvasnytska Yu. H., Ivaskevych L. M., Balitskii A. I., Myalnitsa H. P., and Kvasnytska K. H.</i> Evaluation of the endurance limit of cooled blades of gas turbine engines made of heat-resistant nickel alloy	3	86
<i>Pohrelyuk I. M., Student M. M., Zadorozhna Kh. R., Trush V. S., and Kravchyshyn T. M.</i> Surface modification of titanium by oxidation followed by electrospark alloying with a graphite electrode	3	93
<i>Maksymenko O. P., Hvozdiuk M. M., Kulynych Ya. P., and Ivanytskyi Ya. L.</i> The influence of the initial gap on the fracture of bolted joints of composite materials	3	100
<i>Matviichuk O. O., Andreiev I. V., Litoshenko N. V., Tsysar M. O., Vynar V. A., Hnatenko I. O., Davydenko S. A., and Savchuk I. V.</i> Peculiarities of production and properties of WC + 20 mass% Ni hard alloy with ultra-coarse-grained microstructure	3	108
<i>Suprun V. Ya., Marukha V. I., and Sylovaniuk V. P.</i> Use of polyols of petroleum chemical processing as raw materials for the synthesis of polyurethanes	3	116
<i>Humenetskyi T. V., Masiuk A. S., Levytskyi V. Ye., and Bilyi L. M.</i> The influence of polyvinylpyrrolidone as a polymer modifier on the morphology and properties of copolyamide.....	3	122
<i>Andreikiv O. Ye., Dolinska I. Ya., Liubchak M. O., and Nastasiak S. V.</i> The influence of operational degradation of material on residual life of oil pipelines	4	5
<i>Javorskyj I. M., Yuzefovych R. M., Lychak O. V., Semenov P. O., and Varyvoda M. Z.</i> Vibration analysis of the damaged bearing unit of the port crane lifting mechanism	4	14
<i>Iasnii V. P., Krechkovska H. V., Budz V. I., and Student O. Z.</i> Peculiarities of fatigue fracture of shape memory alloy at different load frequency	4	23
<i>Usov V. V., Shkatuliak N. M., Pavlenko D. V., and Tkachuk O. M.</i> Anisotropy of elastic properties of Inconel 718 alloy specimens obtained by 3D printing	4	32

<i>Adzhamskyi S. V., Kononenko G. A., and Podolskyi R. V.</i> Mechanical properties of Inconel 718 alloy produced by selective laser melting technology with dynamic focusing on the application surface	4	38
<i>Hembara O. V., Syrotyuk A. M., Soviak I. M., Sapuzhak Ya. I., Hembara N. T., and Hrynenko M. V.</i> Analytical estimation of hydrogen concentration in a defective material.....	4	44
<i>Khoma M. S., Ivashkiv V. R., Chuchman M. R., Ratska N. B., and Vasylyv Kh. B.</i> Methodological features of the study of hydrogen permeability through a steel membrane from an acidic environment	4	51
<i>Brodnikovskiy Ye. M., Podhurska V. Ya., Lysunencko N. O., Brodnikovskiy D. M., Polishko I. O., Bezdorozhev O. V., Kyrysha A. A., and Vasylyev O. D.</i> The influence of the anode structure on the electrical properties of a solid oxide fuel cell.....	4	59
<i>Imbirovych N. Yu., Zvirko O. I., and Kurzydowski K. J.</i> Morphology and porosity of titanium alloys surface after plasma-electrolytic oxidation in an alkaline environment with diatomite.....	4	67
<i>Kuskova N. I., Syzonenko O. M., Prystash M. S., and Torpakov A. S.</i> Compacting of material by combining spark plasma sintering and self-expanding high temperature synthesis in Ti–Al–C system	4	75
<i>Ryabtsev I. O., Babinets A. A., Lentugov I. P., Zdanov V. O., Ryabtsev I. I., and Osin V. V.</i> Methods of investigation of the properties of deposited metal and their use for the development of flux-cored wires.....	4	82
<i>Veseliyska H. H., Pohrelyuk I. M., Proskurnyak R. V., and Kuprin O. S.</i> Adhesion strength of TiN coatings deposited on VT1-0 titanium with different surface conditions	4	89
<i>Tomkin D. O., Pedash O. O., Danilov S. M., Klochikhin V. V., Naumyk O. O., and Naumyk V. V.</i> Structure and properties of cast blades made of ЖС3ДК-BI alloy modified with nickel-yttrium ligature	4	95
<i>Sukhatskiy Yu. V., Shepida M. V., and Korniy S. A.</i> Sonochemical synthesis of MnFe ₂ O ₄ spinel nanoparticles	4	102
<i>Kopteva Zh. P., Vortman M. Ya., Iutynska G. O., Kopteva G. E., Abdulina D. R., Lemesko V. M., Terebilenko A. V., Pylypenko A. M., and Shevchenko V. V.</i> Microbial destruction of guanidine containing polymers	4	108
<i>Slobodyan Z. V., Mahlaliuk L. A., Kupovych R. B., Risun Yu. Ya., and Yurkevych R. M.</i> Corrosion inhibition of carbon steel in chloride-acetate solution and in stratal water by nitrogen-containing compounds	4	117
<i>Masiuk A. S., Bilyi L. M., Humenetskyi P. V., Levytskyi V. Ye., and Humenetskyi T. V.</i> Structure and properties of polyester composites with polymer silicate modifier	4	123
<i>Pokhmurskii V. I., Khoma M. S., Chuchman M. R., Vasylyv Kh. B., and Ratska N. B.</i> Effect of temperature and pressure on corrosion and hydrogenation of steel in a chloride-acetate environment with different concentrations of hydrogen sulfide and carbon dioxide.....	5	5
<i>Zvirko O. I., Hredil M. I., Tsyulnyk O. T., Venhryniuk O. I., and Nykyforchyn H. M.</i> A method for assessing the influence of gaseous hydrogen on corrosion and hydrogenation of steels	5	10
<i>Makarenko V. D., Stogniy O. V., Gots V. I., Maksymov S. Yu., and Makarenko Yu. V.</i> Corrosion degradation of long-term operated steel sewage pipes.....	5	18
<i>Nenastina T. O., Berezhna K. V., Sakhnenko M. D., and Buhaievskiy S. O.</i> Degradation of reinforced concrete constructions of bridge structures: corrosion aspect	5	24
<i>Hertsyk O. M., Hula T. H., Yezerska O. A., Nosenko V. K., Korniy S. A., and Tashak M. S.</i> The influence of composition of amorphous alloys on their corrosion resistance in aggressive environments of different nature	5	32
<i>Sukhova O. V.</i> Mechanical and corrosion properties of Fe–B–C alloys.....	5	39

<i>Halaichak S. A., Vynar V. A., Datsko B. M., and Danylchuk M. V.</i> Preparation of Ni–Mo electrochemical coatings from self-regulating electrolytes.....5	46
<i>Sylovaniuk V. P. and Ivantyshyn N. A.</i> The influence of inclusions on mechanical characteristics of structural-heterogeneous materials (Review).....5	51
<i>Andreikiv O. Ye., Dolinska I. Ya., Zviagin N. S., and Liubchak M. O.</i> Determination of the residual life of plates with systems of cracks under action of long-term static load and corrosive environment.....5	61
<i>Lys S. S.</i> Calculation of fuel rods strength under steady-state operating condition5	68
<i>Savruk M. P., Kravets V. S., Onyshko L. Yo., and Kvasniuk O. I.</i> Determination of the stress state of an anisotropic body with smooth curvilinear inclusions under longitudinal shear5	74
<i>Kozachok O. P.</i> The influence of liquid bridge on body contact with a hydrophobic periodically textured rigid base.....5	83
<i>Baranovska O. V., Bagliuk G. A., Buketov A. V., Sapronov O. O., and Baranovskyi D. I.</i> The influence of the dispersed filler based on the Ti–Fe–Si–C system on the physicomaterial properties and structure of epoxy composites.....5	89
<i>Krechkovska H. V., Bakun B. M., Student O. Z., and Kopei I. B.</i> Impact toughness and fractographic peculiarities of fracture of a composite pump rod.....5	97
<i>Trush V. S., Pohrelyuk I. M., Luk'yanenko A. G., Kravchyshyn T. M., Fedirko V. M., Korendii V. M., and Kovalchuk I. V.</i> Kinetics of gas carburizing of Zr–1% Nb alloy5	104
<i>Hnatenko I. O., Andreiev I. V., Lysovenko S. O., Roik O. S., Tsysar M. O., and Kosenchuk T. O.</i> Change of microstructure and properties of WC–Co hard alloy as a result of high- pressure and high-temperature treatment5	111
<i>Teslia S. Yu., Kucher O. S., Bogomol Yu. I., Loboda P. I., and Solodkyi Ye. V.</i> Induction zone sintering of WC–8Co hard alloy5	119
<i>Sydorchuk O. M., Gogaev K. O., Radchenko O. K., Geybat Oglu Askerov M., and Bondarchuk V. I.</i> Temper brittleness of the 4X4H5M4Φ2 steel.....5	125
<i>Narivs'kyi O. E., Snizhnoi G. V., Pulina T. V., Snizhnoi V. L., and Solidor N. A.</i> The influence of the specific magnetic susceptibility of AISI 304 and 08X18H10 steels on their boundary potentials in chloride-containing media6	5
<i>Zin I. M., Datsko B. M., Khlopyk O. P., Sobodosh N. Yo., and Korniy S. A.</i> The influence of zeolite-phosphate corrosion protection pigment on the protective properties of epoxy coating on carbon steel.....6	14
<i>Hertsyk O. M., Izhyk O. B., Yezerska O. A., Kovbuz M. O., Holovchuk M. Ya., Eliyashevskyy Yu. I., and Tashak M. S.</i> Peculiarities of modification of amorphous alloys surface with oligomer coatings from alcohol solutions6	22
<i>Martyniuk A. V., Stechyshyn M. S., Tsepenyuk M. I., Boris M. M., Bandura V. M., and Mikhalevskiy V. Ts.</i> Cavitation-erosion wear of amino plastic in simulated environments of sugar production.....6	28
<i>Shishkina Yu. O., Bagliuk G. A., Kyryliuk Ye. S., Kyryliuk S. F., Tolochyna O. V., and Talash V. M.</i> Structure, phase composition, mechanical and corrosion properties of aluminum-based composites.....6	34
<i>Balitskii A. I., Syrotyuk A. M., and Ivaskevych L. M.</i> The influence of gaseous hydrogen on the properties of heat-resistant nickel-cobalt alloy under static and cyclic loads6	40
<i>Tsyrluk O. T., Student O. Z., Zvirko O. I., Demianchuk D. O., and Venhryniuk O. I.</i> Evaluation of hydrogen brittleness of operated pipe steel by J-integral method.....6	48
<i>Skalskyi V. R. and Stankevych O. M.</i> Acoustic-emission criterion for optimizing the quantity of fiber in the concrete matrix.....6	56
<i>Ivanytskyi Ya. L., Blikharskyi Z. Ya., Maksymenko O. P., Panchenko O. V., and Blikharskyi Ya. Z.</i> Development of a methodology for monitoring the technical state of bridge structures and establishment of safe operation period ...6	64

<i>Krechkovska H. V., Voitovich A. A., Dzyubyk A. R., Kindratskyi B. I., Lampitskyi O. S., and Bohun L. I. Differences in structure and properties of the metal of the beam of bridge construction</i>	6	72
<i>Hanulich B. K. Stress state of a soft interlayer under conditions of plane and axisymmetric deformations.....</i>	6	78
<i>Trembach B. O., Silchenko Yu. A., Sukov M. G., Ratska N. B., Duriagina Z. A., Krasnoshapka I. V., Kabatskyi O. V., and Rebrova O. M. Development of a model of assimilation of alloying elements self-protecting powder wire and optimization of its charge composition</i>	6	83
<i>Zemlianyi A. O., Bys S. S., Shcepatov V. V., Kharchenko S. D., and Hladkyi Ya. M. Energy aspects of tribosystems.....</i>	6	90
<i>Pohrelyuk I. M., Student M. M., Zadorozhna Kh. R., Lavrys S. M., Kravchyshyn T. M., and Kovalchuk I. V. Tribological characteristics of titanium after combined treatment.....</i>	6	95
<i>Ivasenko I. B., Berehulyak O. R., Mandziy T. S., Posuvailo V. M., and Vorobel R. A. Modeling of a laser-modified layer reinforced with silicon carbide particles on an aluminum alloy</i>	6	103
<i>Golovko V. V., Kostin V. A., and Zhukov V. V. The influence of nanomodification on the formation of microstructure of the welded joints metal of low-alloy steel</i>	6	111
<i>Gorban' V. F., Krapivka M. O., and Myslyvchenko O. M. Formation conditions and properties of high-entropy alloys creating the σ-phase</i>	6	118
<i>Bazyljak L. I., Sheparovych R. B., Liutyi P. Ya., Shepida M. V., Kuntiy O. I., and Kytsia A. R. Synthesis and catalytic properties of Ag(Pd) bimetallic nanoparticles</i>	6	124
SCIENTIFIC DISCOVERY		
<i>Skalskyi V. R., Nazarchuk Z. T., Andreikiv O. Ye., and Klym B. P. The phenomenon of jump-like displacement of the domain walls of hydrogenated ferritic-pearlitic steels during their quasi-static remagnetization.....</i>	3	129
JUBILEES
