

Low Temperature Physics/Физика низких температур

Том 41, № 10, 2015

Специальный выпуск (Часть II)

Октябрь 2015

К 80-летию уравнения Ландау–Лифшица

Ответственные за выпуск Б.А. Иванов и А.С. Ковалев

Содержание

Rychły J., Gruszecki P., Mruczkiewicz M., Kłos J.W., Mamica S., and Krawczyk M. Magnonic crystals — prospective structures for shaping spin waves in nanoscale	959
Davies C.S. and Kruglyak V.V. Graded-index magnonics	976
Bogatyrev A.B. and Metlov K.L. Magnetic states in multiply-connected flat nanoelements	984
Sukhostavets Oksana V., Gonzalez Julian M., and Guslienko Konstantin Y. Effective magnetization damping for a dynamical spin texture in metallic ferromagnet	989
Барьяхтар В.Г., Данилевич А.Г. Диссипативная функция ферромагнетика и теория кинетических уравнений Онсагера	997
Zaspel C.E. and Kireev V.E. Vortex-antivortex dynamics driven by spin-torque in a nanocontact	1001
Wysin G.M. Vortex dynamics in thin elliptic ferromagnetic nanodisks	1009
Bozhko D.A., Clausen P., Chumak A.V., Kobljanskyj Yu.V., Hillebrands B., and Serga A.A. Formation of Bose-Einstein magnon condensate via dipolar and exchange thermalization channels	1024
Mamica S. Vortices in two-dimensional nanorings studied by means of the dynamical matrix method	1030
Schroeter Sarah and Garst Markus Scattering of high-energy magnons off a magnetic skyrmion	1043
Bender Scott A. Thermoelectric spin transport through ferromagnetic heterostructures	1054
Chung Sunjae, Mohseni S. Majid, Eklund Anders, Dürrenfeld Philipp, Ranjbar Mojtaba, Sani Sohrab R., Nguyen T.N. Anh, Dumas Randy K., and Åkerman Johan Magnetic droplet solitons in orthogonal spin valves	1063
Панкратова М.Л., Ковалев А.С. Модель обменного смещения в трехслойной структуре ФМ/АФМ/ФМ	1069

Low Temperature Physics/Fizika Nizkikh Temperatur

Volume 41, No. 10, 2015

Special Issue (Part II)

October, 2015

On the 80th anniversary of the Landau–Lifschitz equations

Guest Editors B.A. Ivanov and A.S. Kovalev

Contents

<i>Rychly J., Gruszecki P., Mruczkiewicz M., Kłos J.W., Mamica S., and Krawczyk M.</i> Magnonic crystals — prospective structures for shaping spin waves in nanoscale	959
<i>Davies C.S. and Kruglyak V.V.</i> Graded-index magnonics	976
<i>Bogatyrev A.B. and Metlov K.L.</i> Magnetic states in multiply-connected flat nanoelements	984
<i>Sukhostavets Oksana V., Gonzalez Julian M., and Guslienko Konstantin Y.</i> Effective magnetization damping for a dynamical spin texture in metallic ferromagnet	989
<i>Baryakhtar V.G. and Danilevich A.G.</i> Dissipative function of the ferromagnet and the theory of Onsager's kinetic equations	997
<i>Zaspel C.E. and Kireev V.E.</i> Vortex-antivortex dynamics driven by spin-torque in a nanocontact	1001
<i>Wysin G.M.</i> Vortex dynamics in thin elliptic ferromagnetic nanodisks	1009
<i>Bozhko D.A., Clausen P., Chumak A.V., Kobljanskyj Yu.V., Hillebrands B., and Serga A.A.</i> Formation of Bose-Einstein magnon condensate via dipolar and exchange thermalization channels	1024
<i>Mamica S.</i> Vortices in two-dimensional nanorings studied by means of the dynamical matrix method	1030
<i>Schroeter Sarah and Garst Markus</i> Scattering of high-energy magnons off a magnetic skyrmion	1043
<i>Bender Scott A.</i> Thermoelectric spin transport through ferromagnetic heterostructures	1054
<i>Chung Sunjae, Mohseni S. Majid, Eklund Anders, Dürrenfeld Philipp, Ranjbar Mojtaba, Sani Sohrab R., Nguyen T.N. Anh, Dumas Randy K., and Åkerman Johan</i> Magnetic droplet solitons in orthogonal spin valves	1063
<i>Pankratova M.L. and Kovalev A.S.</i> Exchange bias model of the FM/AFM/FM trilayer structure	1069
