The analysis of an ecological condition of the land of agricultural purpose in Ukraine is carried out. On the basis of the analysis of a current state of structure of land fund and the

recommended ecological parametres availability ecological destructiveness in land tenure system in Ukraine is proved. On the basis of coefficient of ecological stability level of equation of the territorial organisation in regions of Ukraine is specified. Scientific-theoretical bases of balanced development are proved and the structure of events for observance environmental safety conditions of the land of agricultural purpose is offered.

Key words: the land of agricultural purpose, balanced development, rational use and protection of the land, ecological stability.
