Additional Information about Two *Eurytoma* Species, *Eurytoma kuslitzkyi* and *Eurytoma cornuta* (Hymenoptera, Eurytomidae) [Дополнительная информация о двух видах рода *Eurytoma* (Hymenoptera, Eurytomidae) — *Eurytoma kuslitzkyi* и *Eurytoma cornuta*]. — Both species were described in the article: M. D. Zerova, L. Ya. Seryogina “New species of the genus *Eurytoma* (Hymenoptera, Eurytomidae) from Ukraine and Israel“ (Vestnik zoologii. — 2010. — 44, N 2.— P. 173–175). In description of indicated species no depositaries of the primary types were indicated. The holotypes of *Eurytoma kuslitzkyi* Zerova and *E. cornuta* Zerova are deposited in collection of the Schmalhausen Institute of Zoology, National Academy of Sciences of Ukraine (Kyiv). The label of primary type of *Eurytoma kuslitzkyi* Zerova: holotype, ♀, Israel, Rehovot, ex *Bactrocera oleae* (Gmelin) (Tephritidae), 5.08.2008 (Kuslitzky). The species is named after entomologist Wolf Kuslitzky, who reared this species from *Bactrocera oleae* in Israel. The primary type of *Eurytoma cornuta* Zerova: holotype, ♀, Ukraine, Donetsk Province, Nature Reserve Kamennyie Mogily, 26.05.2009 (Simutnik). The species name *cornuta* refers to the characters of mesopleuron sculpture. — **M. D. Zerova** (I. I. Schmalhausen Institute of Zoology, NAS of Ukraine, Kyiv).
